This article is about Google's news aggregator. For the former app, see Google News & Weather. For Google's initiative to support journalists, see Google News Lab. For access to newsgroups through Google, see Google Groups. Google News Google News icon.svg Screenshot Type of site News aggregator Available in 35 languages List of languages Owner Google URL news.google.com Commercial No Registration Not required Launched September 2002; 17 years ago Google News is a news aggregator app developed by Google. It presents a continuous flow of articles organized from thousands of publishers and magazines. Google News is available as an app on Android, iOS, and the Web. Google released a beta version in September 2002 and the official app in January 2006.[1] The initial idea was developed by Krishna Bharat.[2][3] The service has been described as the world's largest news aggregator.[4]
